SUPPORT

With more than two decades of operational and managerial experience, owner and president Salvador Avalos has grown Primetech Silicones from a small silicone compounding facility to a thriving, prospering business. Originally based in Orange, CA, Primetech Silicones has since expanded its capabilities by moving to its current location, a new, larger building in Riverside, CA.

We look forward to demonstrating our ability as a consistent and reliable supplier.

Technology at work for you

CONNECTING YOUR BUSINESS TO THE RESOURCES YOU NEED

At Primetech Silicones, we strive to provide economical and high quality silicone to our valued customers. We've built our reputation on exceptional customer service, quick product turnaround, and hands-on management. We pride ourselves on constantly evaluating and improving our products, providing industry-best quality and timing. When you partner with Primetech, you gain the personal service of Primetech employees who are responsive, experienced, and committed to your success. You also gain the nearly unlimited custom mixing and compounding capabilities Primetech provides.

Creating new materials is our specialty. We're

dedicated to developing custom silicone products to meet our customer's specific needs. Our customers include large and small businesses in a wide variety of industries throughout the United States. Our goal is to provide businesses with the products they need, quickly and easily. We look forward to helping you and your business meet its goals.

flexible solutions for your business needs

EXPERIENCE YOU CAN COUNT ON

Primetech Silicones president Salvador Avalos has twenty-five years of experience in compound and process development using every major type of elastomer. As one of the industry's leading chemists, he can develop, customize, or recommend a product to meet nearly any requirement.

MORE PRODUCT ALTERNATIVES

Instead of providing our customers with a limited set of standard compounds, Primetech Silicones manufactures almost any kind of compound you need to fabricate high quality silicone products. By emphasizing communication and planning with our customers, we aim to create products that exceed our customer's expectations.

QUICK TURNAROUND

We strive to impress our customers with the timeliness of our services. No matter how much or how little material you need, Primetech Silicones can offer you a ready supply. Our compounds usually ship within three to five business days of the order date. Expedited services are also available.

QUALITY ASSURANCE

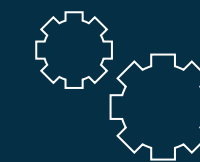

Experienced laboratory technicians evaluate and review each batch of every product we manufacture. Primetech Silicones only delivers a product after it passes our strict quality assurance process.

CUSTOMER SERVICE IS OUR #1 PRIORITY

Every order, big or small, is important to us. Primetech Silicones is dedicated to providing exceptional customer service before, during, and after an order is placed.

HOW WE WORK

Tell us the type of material you need. Our chief chemist will formulate a compound that meets your specifications. We manufacture the product in our on-site compounding facility and your product is tested and re-tested in our state-of-the-art laboratory. Once the material passes inspection, it is packaged and shipped to you in the method of your choice. Will Call and local delivery are also available.
